

LUE

engineering

- Engineering with a human touch

Lue engineering is a full-service engineering firm that helps you turn your ideas into reality.

We provide services in our facilities according to the above diagram, from the smallest consumer product to the bigger industrial machines. Our broad track record includes projects such as:

- Complete laser welding stations
- Automated optical fiber grinder machines
- CNC machines
- Medical simulators
- Implantable drug delivery system
- Analytical instruments
- Stent for trachea support

Our personal experiences in development, manufacture and assembly help us provide accurate quotes and respect budget limits.

We are dedicated to helping you, as is our motto: *Engineering with a human touch.*
